Prohibition Doomed!

After 64 years of activity by the friends of prohibition the average American today consumes almost six times as much liquors as did the average American of 1850. In spite of this there is less drunkenness. With this wonderful change for the better, prohibition has had nothing whatever to do. The real reason is found in the fact that today there is a vastly greater amount of beer consumed. And beer is not conducive to drunkenness.

Prohibition is a failure and has had but one effect wherever tried: to put a ban upon the open and above-board drinking of beer and other light beverages and to drive men to secret, immoderate drinking of the strongest stimulants. This is notably true of Maine, a prohibition state. There is ten times as much drunkenness per capita as there is in France.
